EDUCATION

New York University - Tandon School of Engineering

Expected May 2026

Bachelor of Science in Computer Science

Minors in Cybersecurity, Mathematics

Cumulative GPA: 3.83/4.0

Relevant Coursework: Data Structures, Algorithms, Databases, Software Engineering, Operating Systems, Computer Networking, Full-Stack Web Development, Object-Oriented Programming, Application Security, Computer Security, Network Security, Applied Cryptography, Digital Logic, Machine Learning, Quantum Science, Creative Coding, Game Programming

EXPERIENCE

MirX | Full-Stack Developer

Feb 2025 – Present

- Built 5+ core features for a B2B SaaS platform enabling collaborative merchandise creation among creatives.
- Packaged the application with 10+ RESTful APIs for smooth integration with third-party collaborators.
- Designed frontend workflows across 10+ pages, enabling clear navigation and conversion flows.

Webatrice Open Source Project | Front-End Developer

Jun 2024 – Sep 2025

- Contributed to a platform for playing *Magic: The Gathering* online, supporting 600+ monthly active users.
- Developed responsive front-end features with Vue.js, improving mobile accessibility by 40%.
- Innovated in an Agile environment with distributed contributors, 30+ code reviews, and sprint planning.

Outlier | Machine Learning Evaluation Engineer

May 2024 – Jul 2024

- Assessed and graded 100+ AI responses, providing feedback on performance and improvement areas.
- Identified and resolved 80% of flagged AI output issues, improving reliability.
- Debugged 20+ instances of generated code, ensuring corrected and efficient solutions.

PROJECTS

Food Donation Platform | PostgreSQL, Python, React.js, AWS

Sep 2025 – Present

- Spearheaded a team of 4 to build a food donation platform to help reduce food waste.
- Implemented the frontend with 10+ dynamic components for real-time listing updates and filtering.
- Produced 20+ UML diagrams and technical documents and participated in weekly Scrum meetings to drive development and team alignment.

D&D Social Media Platform | MongoDB, Express.js, React.js, Node.js, AWS

Apr 2024 – Present

- Pioneered a storytelling platform for D&D players, supporting campaign narratives and community sharing.
- Optimized data fetching with client-side caching and TanStack Query, reducing load time by up to 50%.
- Hardened system security by implementing Helmet.js to mitigate 11+ common web security risks.
- Integrated telemetry pipelines and structured back-end logging, reducing manual debugging time by 30%.

Tutoring Platform | PostgreSQL, Ruby on Rails, Agile, BDD, TDD

Sep 2025 – Dec 2025

- Led a team of 7 to design and deliver a production-ready tutoring platform using Ruby on Rails.
- Architected an MVC-based system with 15+ RESTful API endpoints, managing a relational schema with 10 PostgreSQL tables to ensure data integrity and seamless flow.
- Automated CI/CD testing pipelines, achieving 90% code coverage to ensure deployment stability.

Airplane Ticket Platform | MySQL, Express.js, Handlebars, Node.js

Jan 2025 – May 2025

- Created a relational airline reservation system enforcing referential integrity across 10+ entities.
- Built transactional booking, cancellation, and review workflows with 100% ACID compliance.
- Engineered comprehensive staff dashboards for monitoring revenue, ratings, and flight operation status from 50+ mock flight and ticket records.

TECHNICAL SKILLS

- **Languages:** Python, C/C++, Java, JavaScript, TypeScript, Ruby, SQL, Verilog, HTML5, CSS3
- **Full-Stack Development:** MongoDB, Express.js, React.js, Vue.js, Node.js, Next.js, Ruby on Rails, Tailwind
- **Developer Tools:** Git, Bash, PowerShell, VS Code, Docker, VMware, AWS, Wireshark, Supabase
